Message From the Chair

On behalf of the Board, I am pleased to invite you to read our 2025 DRPS Annual Report.

The safety and security of people and property forms the foundation for a stable, vibrant and prosperous community. Our schools, streets, businesses, places of worship, parks – and especially our homes – must be places where we are protected, and feel safe from harm. The police - acting with integrity and impartiality - are instrumental in ensuring the safety of public and private spaces where family, social and economic activity can flourish and grow.

Once again, under the leadership of Chief Moreira and his Command team, the civilian and sworn members of the DRPS delivered positive community safety results to the residents of our Region, and the visitors that we welcome. Through crime prevention, law enforcement, emergency response, assistance to victims and maintaining the public peace, the Service delivered high quality police services in 2025 that earned the support of the community. The rate of both violent and property crime decreased, road safety improved, compliance checks skyrocketed, partnerships were enhanced, and the commitment to diversity, equity and inclusion was strengthened.

Despite positive trends in many areas, we must remain vigilant and sustain our approach to community safety through continued investments – in people, training, infrastructure and partnerships. Threats and challenges to our collective security persist and continue to evolve. Criminals continue to exploit opportunities to prey on the vulnerable, using sophisticated means to commit frauds against seniors and to traffic in young people. Intimate partner violence and the theft of vehicles remain at elevated levels. And challenges related to mental health, addiction, and homelessness continue to confront our sense

of safety. The 2025 budget included funding for an additional 116 new positions, to support frontline policing and investigative capacity. These new positions will enable the expansion of the Financial Crimes and Special Victims units, and the introduction of a dedicated team to investigate auto theft crimes. Additional funding will also allow for the modernization of the Service's administrative and technical support systems and DRPS facilities.

We hope that this year's edition of the Annual Report offers you new insights and perspectives into policing and community safety in Durham Region. We are grateful for the outstanding contributions our police professionals make to keeping our community safe.

Shaun Collier
Chair

Message From the Chief

As we reflect on the past year of service, it is with pride and continued commitment that I present the 2025 Annual Report of the Durham Regional Police Service.

This report highlights the work of our members and our ongoing efforts to keep the communities we serve safe. It demonstrates how our Service continues to adapt to an increasingly complex policing environment, while maintaining a strong focus on community trust, accountability, and service excellence.

The year presented both challenges and opportunities. Our members responded with professionalism and dedication, addressing evolving crime trends while continuing to build strong relationships with our community partners. This report provides an overview of those efforts and the results achieved through collaboration and innovation.

Effective policing today requires a balanced approach, grounded in compassion, responsiveness, and strong partnerships. These principles remain central to our work as we continue to serve a growing and diverse community.

As part of this year's report, we have included a dedicated section on the modernization of policing. In alignment with the Community Safety and Policing Act, modernization remains a key priority for our Service. This work reflects our commitment to enhancing how we deliver policing—through improved technology, updated practices, strengthened training, and a continued focus on community engagement.

Modernization is essential to ensuring that our Service remains equipped to meet current and future demands. It supports our ability to respond effectively to complex investigations, enhance transparency, and build public confidence.

I want to recognize the dedication of our members and thank our community partners for their continued support. Together, we will continue to move forward—focused on delivering modern, responsive, and community-centered policing.

Peter Moreira
Chief of Police

All eight local municipal councils received a presentation from the Board during 2025. The presentations highlighted the responsibilities of the Board, changes and pressures imposed upon the Board and the Service under the *Community Safety and Policing Act*, current areas of focus for the Board, and operational priorities related to community safety and the Board's Strategic Plan. The Board also met with local MPPs during the course of 2025 to advocate on issues such as Provincial funding and bail reform, and outlined operational challenges related firearms, auto theft, mental health and addictions, frauds and scams, intimate partner violence and human trafficking. The Board also convened meetings with community groups including the Durham Children's Aid Society, the Community Development Council of Durham, PFLAG Durham Region, Dnaagdawenmag Binnoojiiyag Child & Family Services, as well as the Durham Region Anti-Racism Task Force. These meetings supported the objective of enhancing community trust, and allowed the Board to communicate its current priorities while supporting improved understanding of the concerns and perspectives of diverse stakeholders.

Farewell to Departing Board Member Welch...

After three years on the Board, Mark Welch's term came to an end in 2025. Mr. Welch's contributions to deliberations and decisions – in particular on matters related to finance, leadership, and equity and diversity – enabled the Board to make important progress in advancing its governance and oversight agenda. His perspectives were always informed by respectful attentiveness to the views of others and his own meticulous analyses. We extend our gratitude to Mr. Welch for his service to the Board and the community during an important period for policing in our Region.

Police Service Board Highlights

Strengthening Trust and Transparency through Engagement

Throughout 2025, the Board continued to enhance its visibility in order to foster and nurture community trust and confidence in our Police Service. By actively participating in numerous meetings and events, and engaging with a broad range of perspectives, the Board was well positioned to set policing priorities and objectives, develop policies and budgets, and evaluate whether the community's policing needs are being met.

...and Welcome Board Member Fahey

The Board welcomed Mr. John Fahey to its membership in early 2025. Mr. Fahey's analytical expertise and commitment to community and member engagement have supported effective governance and oversight. His wealth of experience in risk assessment and management, finance, and leadership will enable the Board to continue to apply rigour and diligence to all of its decisions, while maintaining a relentless focus on planning and outcomes.

Strategic Plan Review

The Durham Regional Police Service's Strategic Plan was developed through extensive engagement with thousands of Durham community members, partner agencies, community stakeholders, and DRPS members, as well as informed by key issues identified in Durham Region's Community Safety and Wellbeing Plan. Launched in 2024, the Strategic Plan establishes the Service's goals and objectives, guiding decision-making related to priorities and the allocation of resources.

In support of transparency, accountability, and public trust, DRPS reports to the Durham Regional Police Service Board on progress toward its Strategic Plan goals and objectives twice annually, in March and September, through established success indicators. In 2025, the Service

further enhanced this reporting by introducing monthly Strategic Plan Feature Presentations at Board meetings. These public presentations highlight initiatives, programs, and activities that demonstrate how DRPS is advancing its Strategic Plan goals beyond quantitative indicators. Featured topics in 2025 included Court Services - Disclosure, Victim Services of Durham Region, Recruitment, Community Response Unit, and the Monday Night Project.

The year 2025 marked the Service's second year working toward the goals and objectives set out in the Strategic Plan. Success measure data for 2025 are available for download [here](#), with key highlights of Service-wide initiatives from the year presented below.

2025 Service-Wide Initiatives

Community Response Unit

In January 2025, DRPS realigned its Community Response Unit (CRU) to better support organizational priorities and respond to evolving community needs. The unit's mandate focuses on enhancing community safety through proactive crime prevention, problem-oriented policing, and meaningful community engagement.

CRU is a cornerstone of the Service's prevention-focused approach, increasing both visibility and accessibility through-out the community. The unit deploys uniformed officers dedicated to building and sustaining relationships with youth, businesses, and community partners. Through collaboration, CRU co-develops solutions that are evidence-informed, responsive to community concerns, and aligned with local and priorities.

Alignment with the Strategic Plan

The realignment of CRU reflects DRPS' ongoing commitment to **innovative, modern policing practices**. The unit is comprised of a Sergeant, Community Response Team, School Liaison Officer, Traffic Safety Coordinator, and Crime Prevention Officers (CPOs). CPOs apply evidence-based Crime Prevention Through Environmental Design (CPTED) principles to reduce opportunities for crime and enhance public safety.

CRU leverages crime trend data and community insights to guide initiatives and proactive-directed patrol strategies. This intelligence-led approach enables the unit to address both short- and long-term divisional priorities, ensuring a timely and effective **response to emerging issues**.

Building and maintaining strong community relationships is central to CRU's work and directly supports the Strategic Plan's focus on **strengthening strategic partnerships to improve community safety**. The unit collaborates closely

with municipal by-law services, emergency services, and local Business Improvement Associations (BIAs), among others, to develop coordinated and community-driven responses. These partnerships are grounded in mutual trust, shared responsibility, and a commitment to achieving positive outcomes.

Through its emphasis on evidence-based practices, increased visibility, and sustained community engagement, CRU plays a key role in strengthening **the trust and confidence of local communities** in policing across Durham Region.

CRU also contributes to organizational excellence by **supporting the development of an adaptable, highly skilled workforce**, while advancing **members' knowledge, skill development, and professionalism** through the Constable Development Program. Participating officers complete a six-month placement with the unit, gaining practical experience in proactive policing, community engagement, and problem-solving. During this placement, officers have opportunities to:

- Participate in community events and outreach initiatives
- Identify and address community concerns
- Implement crime prevention strategies aligned with local needs
- Conduct highly visible foot and bike patrols
- Use data, evidence, and community input to co-develop solutions to community concerns

This hands-on experience strengthens members' skills while reinforcing DRPS' commitment to collaborative, community-focused policing.

Criminal Investigations Branch

In early 2025, DRPS implemented a redesigned structure and mandate for its Criminal Investigations Branch (CIB), with a focus on enhancing frontline support and strengthening investigative capacity across the Service. The new model introduced Divisional Platoon CIB officers alongside two dedicated Crime Teams – the East and West Crime Teams.

Under this model, Platoon CIB officers now operate on the same shift schedule as frontline platoons, enabling seamless 24/7 integration with frontline operations. The realignment fosters a more collaborative and responsive policing environment, supporting frontline members from initial call response through to investigation, crown brief preparation, custody management, and follow-up. The result is a more coordinated approach that enhances service delivery, strengthens oversight and accountability, and promotes continuous learning across the Service.

The East and West Crime Teams are responsible for complex investigations requiring sustained focus and specialized expertise. These cases are often serial in nature and demand resources that would otherwise impact Platoon CIB's ability to support frontline operations. By assigning these investigations to Crime Teams, the model ensures both effective case management and consistent frontline support.

Alignment with the Strategic Plan

The CIB redesign reflects DRPS' commitment to **innovative and modernized policing** by aligning its structure and operations with evidence-based decision making. The integrated platoon model strengthens collaboration between investigative and frontline functions, resulting in improved operational efficiency, enhanced investigative outcomes, and more effective service delivery to the community.

Frontline members now benefit from timely and consistent access to investigative expertise, particularly through CIB's priority of attending

scenes alongside responding officers. This approach not only improves the quality and continuity of investigations, but also enables frontline officers to return to calls for service more quickly, with CIB assuming key investigation-related administrative responsibilities. The dedicated Crime Teams further support this model by managing resource-intensive investigations, ensuring Platoon CIB members remain available to meet frontline needs. Together, these enhancements contribute to DRPS' ongoing efforts to **strengthen public trust and confidence, while also supporting members** through a more integrated, responsive, and effective policing model.

CIB is also a key component of the Constable Development Program, providing participating members with a six-month rotation focused on investigative training and skill development. This hands-on experience supports both individual growth and organizational objectives by contributing to the **development of an empowered, adaptable, and highly skilled workforce, while promoting members knowledge, professionalism, and continuous learning**. During this rotation, members gain experience in:

- Conducting criminal investigations in accordance with legislative and regulatory requirements
- Collaborating with DRPS units, the Crown Attorney, and other police services
- Supporting victims through the investigative and judicial process
- Attending and managing crime scenes, including evidence collection
- Interviewing witnesses, victims, and suspects
- Preparing and executing judicial authorizations, Crown Briefs, and other documents

This structured development opportunity enhances investigative competency across the Service while reinforcing DRPS' commitment to professional excellence and community trust.

Recruitment Campaign

In 2025, DRPS launched its largest recruitment campaign to date, centred on the message: "Embrace the Challenge. Make an Impact." The campaign was designed to attract talented individuals committed to serving the community with integrity. To support this goal, DRPS leveraged targeted digital channels to reach potential candidates and encourage them to consider a purpose-driven career in policing. As Durham Region continues to experience rapid population growth, the need to attract dedicated and skilled individuals has become increasingly important.

The campaign delivered measurable results. Between July 2 and October 21, 2025, the Service received 295 applications, compared to 197 applications during the same period in 2024—an increase of approximately 49.7 per cent. This growth translated into stronger hiring outcomes, with 28 recruits hired from the 2025 applicant pool, up from 10 hires the previous year, representing a 180 per cent increase. These results reflect a more competitive and responsive recruitment process, supporting the Service's efforts to meet current and future staffing needs.

Alignment with the Strategic Plan

The success of the recruitment campaign directly supports the Strategic Plan's goal to **develop a representative, empowered, adaptable, and highly skilled workforce**. By expanding the applicant pool and strengthening hiring outcomes, DRPS is better positioned to identify and select candidates who bring a broad range of skills, experiences, and perspectives to the organization.

These enhanced recruitment outcomes contribute to building a workforce that reflects the community it serves while ensuring members are equipped to respond to increasingly complex policing demands. Increased hiring also strengthens the Service's ability to **provide the necessary and timely human resources** to frontline and specialized units, supporting members in maintaining community safety effectively. This directly aligns with the Strategic Plan priority **to earn the trust and confidence of members and the community** by ensuring the Service has the resources required to deliver responsive and effective policing.

Through continued investment in recruitment and talent attraction, DRPS is advancing its commitment to modern policing while reinforcing public trust and confidence.

Modernization

Drone Program

DRPS continues to build and strengthen our drone program as part of our commitment to modern, responsive policing and enhanced frontline operations.

In 2025, regularly deployed drones operated from frontline vehicles played a significant role in supporting day-to-day policing operations. These drones provide officers with an immediate aerial perspective at incident scenes, improving situational awareness, supporting search efforts, and enhancing both officer and public safety.

Over the course of the year, these deployments resulted in 3,043 total flights, representing 550 hours in the air. Of these, 361 flights (86 hours) were operational responses initiated through 911

calls, reflecting the growing reliance on aerial support for time-sensitive incidents. These efforts contributed to 11 successful locate outcomes, including missing persons, individuals in crisis, suspicious persons, and wanted persons.

At the beginning of 2025, the program was supported by just three operational pilots—two frontline officers and one Tactical Unit member—which limited overall deployment capacity. In November 2025, Durham Regional Police launched its first in-house pilot certification course, adding 20 new frontline pilots and increasing operational capacity by more than 600 per cent. This expansion is the primary reason for lower deployment numbers earlier in the year, with flight activity already surpassing 2025 totals in 2026.

The Service now operates its own in-house drone flight school, which has significantly strengthened frontline capabilities. Through this program, members complete a one-week ground school and obtain their Transport Canada Advanced Pilot certification. Pilots must then successfully complete four operational training scenarios and a final flight review before being designated as operational.

To maintain operational status, pilots are required to complete a minimum of four flight hours within a 60-day period through either training or active deployments. This requirement ensures proficiency and readiness, and is a key factor contributing to the overall volume of drone flights.

In 2025, the Service further advanced this work through the development of a Drone as First Responder (DFR) pilot program, which was officially launched in February 2026. The DFR system complements drones already deployed from frontline vehicles by providing an added layer of support through strategically positioned drone docking sites across the Region. These sites enable rapid deployment and continuous coverage, enhancing the Service's ability to respond quickly and effectively to dynamic situations. DRPS is among the first police services in Canada to implement a DFR pilot of this kind.

Together, these advancements strengthen situational awareness, improve response capabilities, and support safer outcomes for both officers and the community.

Social Media Presence

As part of its commitment to modern, transparent policing, DRPS continues to leverage social media as a critical tool to communicate, inform, and engage with the community in real time.

The Service's social media platforms play an increasingly important operational role, supporting investigations and public safety efforts. Timely posts related to missing persons, wanted individuals, and ongoing incidents enable officers to quickly reach a broad audience, often generating valuable tips and information. In many cases, this direct connection with the community has contributed to locating missing persons, identifying suspects, and advancing investigations.

DRPS continues to see strong growth and engagement across its digital platforms. The corporate Facebook account now has 91,849 followers, representing a 22 per cent increase from 2024 and a 40 per cent increase from 2023. The corporate X (formerly Twitter) account has 105,460 followers, while all five Divisions and Traffic Services remain active on X, sharing localized updates with their communities. Instagram presence has expanded significantly, with a corporate following of 26,198—an increase of 62 per cent over 2024—and all Divisions, along with Communications/911, now maintaining active accounts with nearly 15,000 additional followers combined.

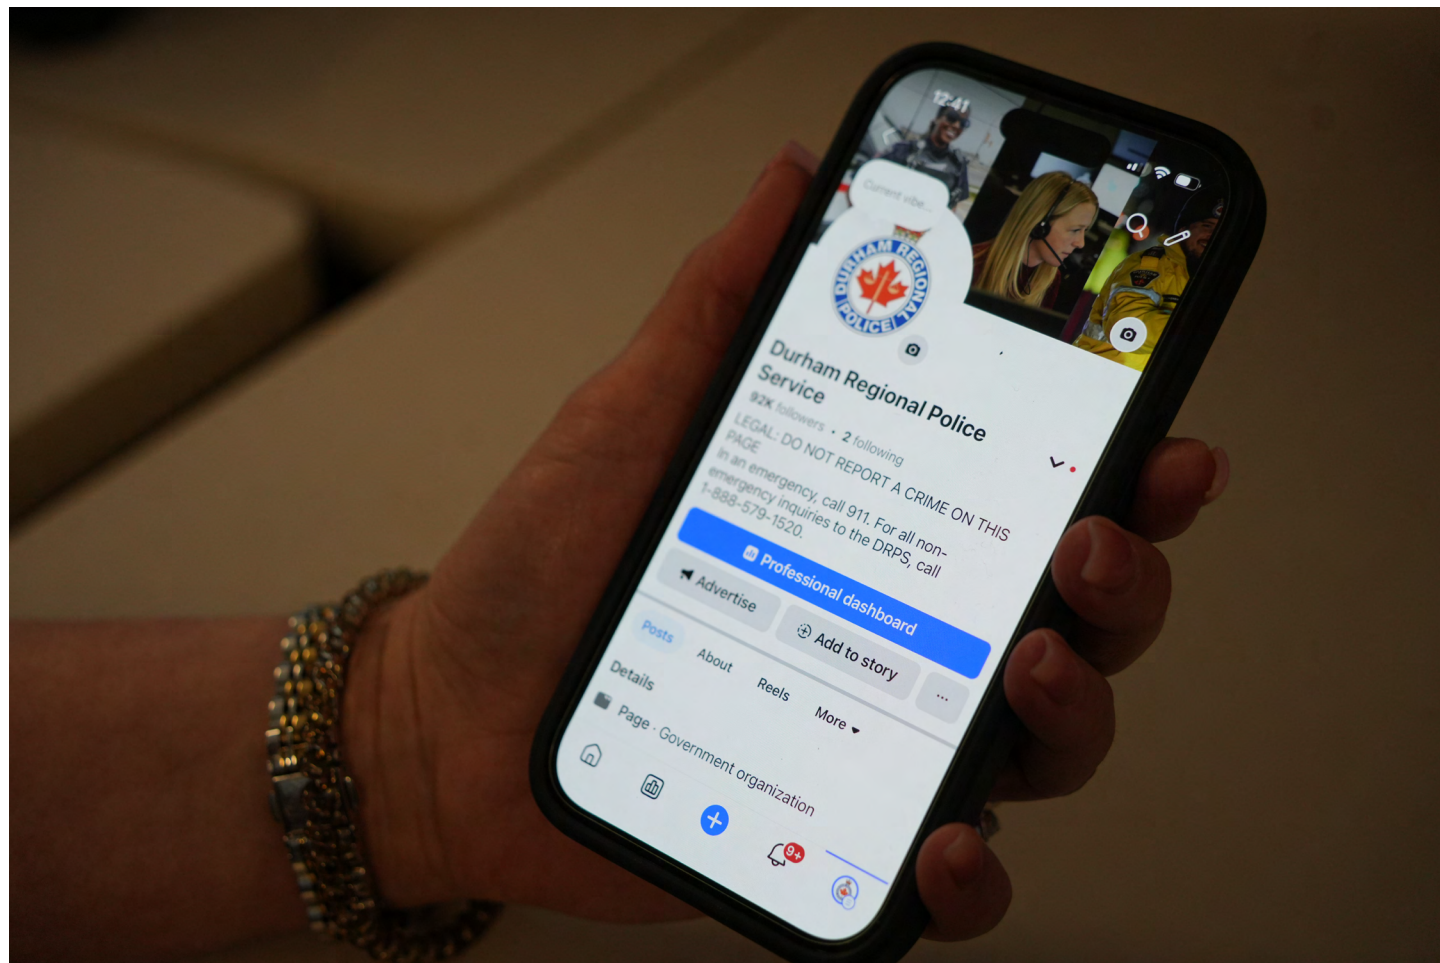

In 2025, DRPS social media content across Facebook, X, Instagram, and LinkedIn reached 74.9 million impressions, a 62 per cent increase from the previous year. This growth was matched by a strong engagement rate of 10.35 per cent, demonstrating meaningful and sustained interaction with the public. Video content continues to be a key driver of engagement, with DRPS videos viewed 1.4 million times—nearly double the 734,000 views recorded in 2024—supported in part by an increase in operational and video news release content.

Complementing its social media platforms, DRPS continues to prioritize digital engagement through its website, www.drps.ca, which serves as a central hub for public safety information, investigative updates, and crime prevention resources. All Divisions are equipped with QR code handout cards that officers can distribute during Notification of Community Crime initiatives, providing residents with direct access to timely, location-specific information that can be updated in real time.

Originally redesigned in 2021, the DRPS website was further enhanced in 2025 through a migration to the GovStack platform, improving functionality, usability, and overall user experience. These enhancements were recognized through a WebAward for Community Engagement and three IAC Award distinctions for Best General Interest Website, Best Online Community Website, and Best Other Website.

With an average of 75,000 monthly visitors, the DRPS website remains a consistent and trusted resource for the community.

Together, these digital tools strengthen communication, enhance investigative capabilities, and reinforce the important role the public plays in supporting community safety.

Bail Compliance Dashboard

As part of its commitment to leveraging data and technology to enhance public safety, DRPS continues to advance the Bail Compliance Dashboard (BCD), a tool designed to strengthen bail enforcement and improve frontline situational awareness.

Launched in July 2022, the BCD uses modern mapping and data visualization to provide officers with real-time access to bail-related information. This supports more proactive compliance checks, enhances investigative capabilities, and helps identify individuals who may present increased risk within the community.

Since its introduction, the BCD has contributed to a significant and sustained increase in compliance checks across the Service. In 2021, prior to the launch, DRPS conducted 1,168 checks.

This increased to 1,734 in 2022, the year the dashboard was introduced, and continued to climb to 3,423 in 2023, the first full year of implementation. Activity more than doubled again in subsequent years, reaching 5,741 checks in 2024 and 7,876 in 2025.

The ongoing success of the program was recognized in 2025 when the Bail Compliance Dashboard Unit (BCDU) received a Police Appreciation Dinner Awards Night (PADAN) award for its work in advancing bail enforcement practices.

Building on this momentum, the BCDU expanded in early 2026 with the addition of a dedicated Detective, with further growth anticipated through the addition of a third Detective Constable. These enhancements will support the continued evolution of the dashboard and reinforce its role as a key tool in modern, intelligence-led policing.

CAMSafe

As part of its commitment to modern, community-informed policing, DRPS launched CAMSafe in November 2025—an initiative designed to strengthen collaboration between police and the public through the use of existing technology across the Region.

CAMSafe is a free, voluntary registry that allows residents and business owners to register the location of privately owned security cameras, including doorbell cameras, CCTV systems, and other surveillance devices. The program does not provide police with direct access to any camera systems. Instead, it enables officers to identify where cameras may be located and contact owners directly when footage may assist an investigation.

Since its launch, the program has seen strong early uptake, with more than 800 residents and business owners registering their cameras.

By creating a centralized database of camera locations, CAMSafe enhances investigative efficiency and supports more timely access to potential video evidence. Officers can quickly identify nearby cameras during an incident, reducing the need for time-intensive neighbourhood canvassing and allowing resources to be focused on other aspects of the investigation.

Originally developed by the Belleville Police Service, CAMSafe has been adopted by police services across Ontario. Its introduction in Durham Region reflects DRPS' continued investment in practical, technology-enabled solutions that support public safety while maintaining community trust and privacy.

Together, this approach strengthens investigative capabilities, improves response efficiency, and reinforces the important role the community plays in helping to prevent and solve crime.

Traffic Safety

Festive R.I.D.E.

For six weeks, the DRPS Festive R.I.D.E. team aimed to Reduce Impaired Driving Everywhere. Impaired driving is the leading criminal cause of death in Canada and the holiday season remains a time of high risk for impaired driving.

Durham Vision Zero

DRPS Traffic Services continues to support the Durham Vision Zero Strategy, a region-wide initiative aimed at making roads safer for drivers, pedestrians and cyclists. This work is led in collaboration with the Regional Municipality of Durham.

Public education is a crucial part of this strategy – traffic safety tips and road safety reminders are posted on all DRPS social media channels on an on-going basis.

As part of an impaired driving awareness campaign, DRPS members visited a local school to talk with students about road safety. Students shared their thoughts on why people shouldn't drive impaired, helping spread the message in a relatable way. DRPS also created a video featuring the students explaining why drinking and driving is dangerous, helping to reinforce the message.

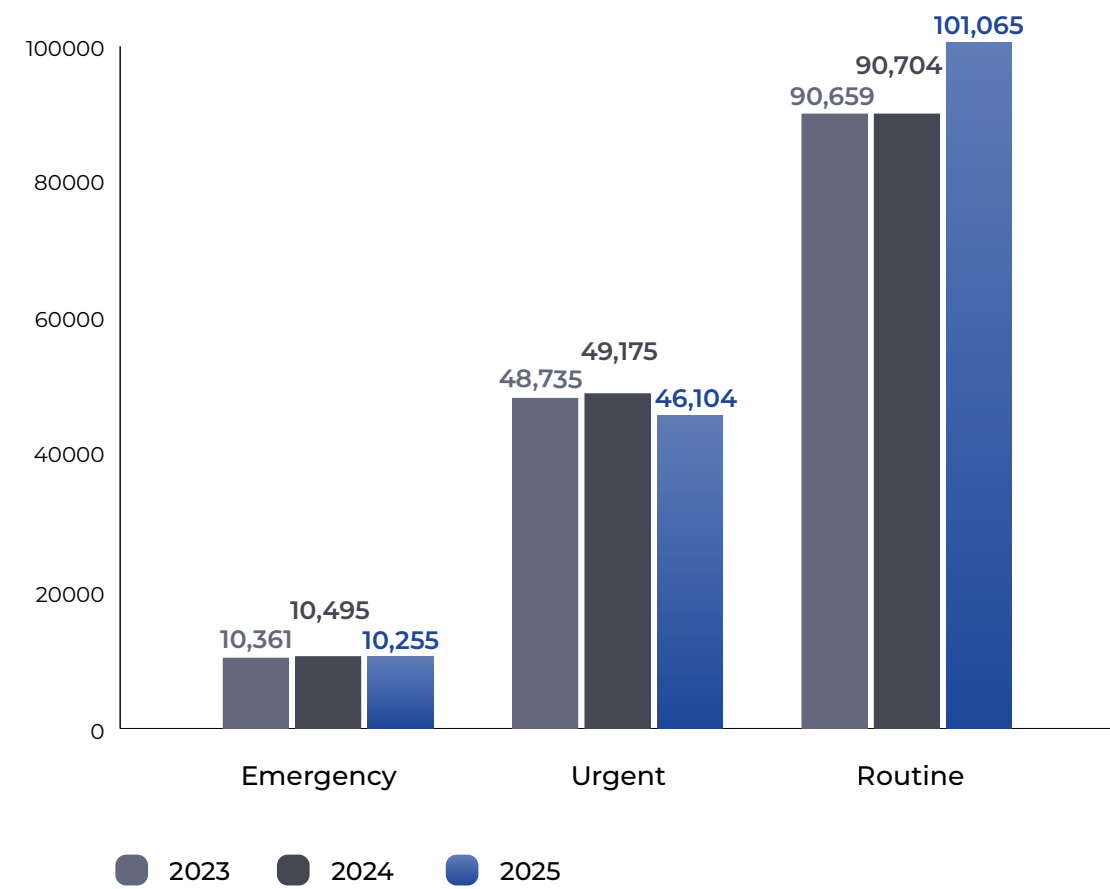

Regional Results

DRPS officers patrol the approximately 2,500 square kilometres that make up Durham Region, backed up by a team of dedicated civilian members. As the 10th largest municipal police service in Canada, DRPS faces many challenges, but is constantly evolving in order to help prevent and solve issues in the community every day.

Oversight

Special Investigations Unit

The Special Investigations Unit (SIU) is the civilian oversight agency responsible for investigating circumstances involving police that have resulted in a death, serious injury, or allegations of sexual assault of a civilian in Ontario, Canada. In 2025, the SIU invoked their mandate four (4) times in Durham, compared to fourteen (14) times in 2024. Three (3) were closed with no further action and one (1) is still pending.

Public Complaints

The public complaints system is overseen by the Law Enforcement Complaints Agency (LECA), formerly known as the Office of the Independent Police Review Director (OIPRD) prior to April 1st, 2024. LECA received 247 public complaints with respect to the conduct of DRPS officers in 2025. This represented an 47.9% increase from the 167 complaints received in 2024. It should be noted that policy/service complaints now fall exclusively under the jurisdiction of the Inspectorate of

Policing as of April 1st, 2024. Of the 247 public complaints involving DRPS officers, conduct, services or policies, 161 were addressed by LECA as follows:

- 156 were screened out by the LECA and closed based on the criteria outlined in the Oversight Appendix
- Two were assigned by the LECA to another Service for Investigation (OPP) where one was unsubstantiated, and one is still pending
- Two were assigned by the LECA to the DRPS to investigate external Services officers (Belleville Police & Kawartha Lakes Police) which were both unsubstantiated
- One case was retained by the LECA for investigation which is still pending

The remaining 86 public complaints were assigned to DRPS' Professional Standards Unit (PSU) for investigation. This is a 38.70% increase from the 62 that were assigned to PSU in 2024.

78 of those public complaints have been resolved as follows:

- Four were closed by way of Early Resolution
- 38 were closed by way of an Informal Resolution Agreement
- Two were Substantiated
- Three were Terminated by LECA
- 20 were deemed unsubstantiated (at the conclusion of the investigation), and
- 11 were withdrawn by the complainants

There are eight (8) remaining public complaints under investigation.
